

Welcome to your new neighbourhood park

INTRODUCING TOTE PARK

Our recent annual survey of over 300 local residents identified a strong desire for more public open space in the area and the team behind Moonee Valley Park is proud to play our part in meeting this community need.

Tote Park - Artist's impression

Behind the hoarding on McPherson Street in Moonee Ponds, works for a half hectare park are well underway. Tote Park is one of the cornerstones of the vision for Moonee Valley Park, a new neighbourhood within a grand botanical park.

Due for completion in early September 2020, the park will feature stunning flower beds, serpentine gardens, a nature inspired playground for families, and open grassy lawns where locals can relax, unwind and get active.

The children's section of Tote Park called Nature Play, is set to feature a lavender maze, timber crawl throughs, interactive sculptures, climbing frames, sound tubes, a sand play area and imagination play florist shop, all to encourage little ones to interact with the natural environment.

Tote Park will also be a blank canvas for an exciting calendar of future community activations and events, whether it be outdoor yoga classes, group fitness training, live music or culinary exhibitions.

Playground

Lush landscapes

Renovations are underway on the heritage listed Tote building which was built in 1931 and is being restored to its former glory and re-purposed into a contemporary food and beverage offering. This exciting new destination will be open in mid 2021.

We look forward to sharing further information on this vibrant green space as it comes to life.
